

House Numbers ...

Is your house number *clearly marked* and *visible* from the street?

Seconds Count in an Emergency!!

Help protect your family and your property by having large visible numbers identifying your property.

Emergency Personnel can find you faster when your home is properly marked (especially during an emergency)

Use Large Visible Numbers

Numbers need to be at least 3-inches in height and facing the street.

Put the numbers under lighting, and use numbers with a contrasting background so they will be visible at night and not blend in with the color of your house.

It's the law

City of Belen Law (Ord. 15.36.050) specifies that every building in the city must have clearly visible address numbers posted on their building.
